

STAT 302 Project 2 Instructions

1. [Thinks to think about](#)

- Answer Question 1 and one other question. Two questions in total.
- Don't just report R codes without any explanations. Explain your reasoning and justifications.
- Answer questions to the best of your knowledge. This is open book and available to use any other resources.
- Three students (maximum) in a group.
- If two or more groups submit the same or similar work, each group will receive a "0". Please see UW policy for submitting same work [here](#).

2. [Logistics](#)

- Please answer two questions. Question 1 and any other question.
- Only one person in the group should submit the course project.
- If you change your group (or working by yourself), let me know by Sunday (06/04).

3. [Submission and Presentation](#)

- Please answer all questions using R Markdown. We don't care about how many pages you have, just make sure to answer all the questions being asked.
- Attached your .Rmd file as well. Make sure I can run the codes without having to contact you.
- If you made any changes to the data, please upload the final version as well.
- Please **sign the form**. Else, your project won't be graded.
- You should see your score in the grade-book before grades are due. You are always welcome to come see your project in-person (by appointment) after grades are released.
